

Leverage Tradewin and Tradeflow in your Customs Brokerage Process

CURRENT CHALLENGES

ARE YOU EXPERIENCING ANY OF THE FOLLOWING?

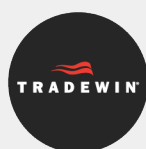

- Finding and maintaining proper classification codes
- Ensuring Supply chain security
- Dealing with long-term software contracts
- Researching Country-specific import requirements
- Disjointed or unsynchronized databases/ERPs
- Maintaining your brand's integrity and reputation

LEVERAGING TRADEFLOW AND TRADEWIN FOR CUSTOMS

Tradeflow facilitates global supply chain movement by monitoring changes related to landed cost, regulatory controls, global commodity classification, and compliance management. We validate all vital information about your commodities and populate it on documents to then be distributed to your stakeholders for import and export declaration processing.

Tradeflow operates as a value-added compliance check between Tradewin and Customs Brokerage. Using Tradeflow, you ensure that your commodities are classified, validated, and prepared for an accurate and compliant declaration.

With our shipment management service offering, we give you the platform to create import notifications and country-specific documents to distribute to your global Trade Partners and Service Providers. Using Tradeflow, you ensure your commodity has been properly classified, your trade partner is screened against denied parties, forced labor, and global sanction lists, and your documents are prepared for Customs declarations. Our unique web-based software distributes these commercial documents effortlessly and improves communications between all parties within your supply chain.
